

The shape and design of the EVORA fireplace stoves closely follow the latest interior design trends. EVORA is a great choice for a wide spectrum of customers and has become a highly popular model.

EVORA T Fireplace stoves

The EVORA T fireplace stoves provides more than one point of view of the flames. The rotating combustion chamber allows you to view your fire from multiple angles.

This fireplace stove is suitable for low-energy homes. An EAI (External Air Intake) system is included. The standard version includes an upper flue gas exhaust. Thanks to the secondary air intake, the door glass is air-washed to prevent the cumulation of soot. The combustion chamber is lined with chamotte brick tiles. The primary and secondary air intakes are regulated by a single control element.
