

DYNAMIC fireplace inserts WITH DOUBLE / TRIPLE GLAZING AND A HOT-WATER EXCHANGER

DYNAMIC hot-water fireplace inserts with double / triple glazing will become a fully-fledged, central source of heating. Get added value in the form of heat and hot water for your home.

DYNAMIC fireplace inserts are well suited for low-energy houses thanks to their double and triple glazing. The door frame is made of a special rigid rolled profile. The special patented design of the TRIPLE PASS hot-water exchanger will increase fireplace insert efficiency by up to 10 %. The volume of the hot-water exchanger is 71 l. Fireplace inserts are equipped with an EAI (external air intake) system and designed for accumulation as well as convection operation. The combustion chamber is lined with chamotte bricks, the bottom is supported by insulation boards and a hinged iron grate with an ash tray. Secondary air intake washes over the glass in the door to prevent the cumulation of deposits. Primary and secondary air intake is regulated by a single control element. The insert also includes preparation for a door switch and reinforced insulation of the hot-water exchanger casing. Safety is ensured by an integrated cooling loop and the package also includes a cooling and air-escape valve.

triple glazing

optional shifting of hinges

Technical parameters

Height	1279 mm
Width	840 mm
Depth	519 mm
Door height	456 mm
Door width	619 mm
Weight	300 kg
Regulated output	5,8-15,1 kW
Regulated output of water exchanger	4,3-11,3 kW
Smoke flue diameter	180 mm
Flue socket diameter	180 mm
External air intake diameter	150 mm
Draught	12 Pa
Efficiency	88,0 %
Average wood consumption	3,1 kg/h
A+	

Accessories

ADJUSTABLE LEGS - 190 mm
