

IMPRESSION fireplace inserts WITH SIDE OPENING AND SPLIT CORNER GLAZING

IMPRESSION corner fireplace inserts are specially designed to the smallest detail to make everyday heating an enjoyable experience. The corner glazing design features small but elaborate details that lend the IMPRESSION series a unique charm and exclusivity.

IMPRESSION fireplace inserts with side opening and split corner glazing have unusually high glass windows, offering a luxurious view of the fire. Corner glazing (left, right) consists of two parts. The combustion chamber is available in black or cream colour with an optional change for the furnace grate. Inserts are designed for accumulation and convection operation. The innovative DOUBLE SPIN flue gas system increases efficiency and reduces the environmental impact of the fireplace insert. Secondary air intake washes over the glass in the door to prevent the cumulation of deposits. Primary and secondary air intake is regulated by a single control element. Fireplace inserts are equipped with an EAI (external air intake) system, which can be easily connected using the AIRBOX rotating elbow. The flue gas exhaust can be connected from the side or the top. Side and top MAMMOTH accumulation sets can be purchased separately for fireplace inserts, which can extend the period of heat radiation by more than 12 hours.
